

HAIRCUT HANDBOOK & GUIDE (WOMEN'S ADDITION)

Created by Hairstylist Stephen Marinaro

H A I R C U T S H A P E S

Square, Round, Triangular

SQUARE

WHAT IS A SQUARE SHAPE

Square layers are a haircutting technique where the hair is cut evenly at the same length across the head, creating a strong, structured shape. This approach maintains equal weight and balance from the front to the back, resulting in a more uniform and angular look. Square layers are often used to create a modern, tailored style with defined edges and a balanced appearance.

SQUARE

BEST FACE SHAPES FOR A SQUARE CUT

A square haircut works best for the following face shapes:

1. **Round Face:** The angular lines of a square haircut help balance the softness of a round face, creating a more defined and elongated appearance.
2. **Oval Face:** Since an oval face is well-balanced, a square haircut enhances its natural symmetry while adding structure and dimension.
3. **Heart-Shaped Face:** The weight and structure of a square haircut can soften a wider forehead while balancing a narrower jawline.
4. **Diamond Face:** A square haircut helps broaden the appearance of the forehead and jawline, balancing the narrower points of the face.

Avoid this haircut for very square or rectangular faces, as it can exaggerate angular features unless softened with texture or layering.

Round

WHAT IS A ROUND SHAPE

A round shape in haircutting refers to a technique where the hair is cut shorter in the front and gradually becomes longer toward the back. This creates a soft, curved appearance that follows the natural shape of the head. The result is a more fluid, rounded look with less harshness and more movement. This technique is often used to frame the face, add softness, and create a more balanced, natural appearance.

Round

BEST FACE SHAPES FOR A ROUND CUT

The best face shapes for a **round haircut** include:

1. **Square Face:** A round cut softens the sharp angles of a square face, creating a more balanced and gentle appearance.
2. **Diamond Face:** The rounded shape adds width at the jawline and forehead, balancing the narrow points of a diamond-shaped face.
3. **Heart-Shaped Face:** A round cut can soften a wider forehead and create more volume around the jawline, balancing the overall look.
4. **Rectangular Face:** The round shape reduces the appearance of length, making the face look shorter and more proportionate.

Avoid a round cut on **round faces**, as it can emphasize fullness unless paired with face-framing layers or texture to add dimension and structure.

Triangular

WHAT IS A TRIANGULAR SHAPE

A **triangular shape** in haircutting refers to a style where the hair is shorter in the back and gradually becomes longer toward the front. This creates an inverted or A-line effect, forming a triangle-like silhouette when viewed from the side. The triangular shape adds weight and volume toward the front, making it ideal for creating strong, face-framing looks and emphasizing facial features. It's commonly seen in bob haircuts, long layers, and edgy, fashion-forward styles.

Triangular

BEST FACE SHAPES FOR A TRIANGULAR CUT

The best face shapes for a **triangular cut** include:

1. **Oval Face:** Since this face shape is well-balanced, a triangular cut enhances features while adding dynamic structure.
2. **Heart-Shaped Face:** The longer front pieces of a triangular cut balance a wider forehead and narrow jawline by adding length and framing the face.
3. **Diamond Face:** A triangular cut softens a narrow chin while emphasizing cheekbones and balancing the face's natural angles.
4. **Round Face:** The longer front layers create vertical lines that elongate the face, making it appear slimmer.

Avoid triangular cuts on **square** or **rectangular faces** unless softened with layers or texture, as the angular front can emphasize jawline width.

Bangs/Fringe

SHOULD YOU WEAR A FRINGE/BANGS?

What is a Fringe?

- Definition: A fringe, commonly called bangs in the U.S., is a section of hair cut to cover the forehead. Fringes can vary in length, thickness, and style.
- Styles of Fringes:
 - Blunt Bangs: Straight across, cut just above the eyebrows for a bold look.
 - Side-Swept Bangs: Angled to one side for a softer, versatile appearance.
 - Curtain Bangs: Parted in the middle, framing the face for a retro-modern vibe.
 - Wispy Bangs: Thin, soft bangs for a subtle touch.
 - Textured or Choppy Bangs: For an edgy, layered look.

Bangs/Fringe

SHOULD YOU WEAR A FRINGE/BANGS?

When Should a Woman Wear Bangs?

Bangs can enhance a hairstyle when they suit the individual's face shape, hair texture, and lifestyle.

Here's when bangs are a good idea:

1. Face Shape Considerations:

- Oval Face: Most bang styles work, but blunt or curtain bangs complement this balanced shape.
- Round Face: Side-swept or long curtain bangs add length and balance.
- Square Face: Soft, textured bangs soften angular features.
- Heart-Shaped Face: Wispy bangs or side-swept styles balance a wider forehead.
- Long Face: Blunt bangs can make the face appear shorter.

2. Hair Texture:

- Straight Hair: Works well for most bangs, especially blunt or curtain bangs.
- Wavy Hair: Soft, textured bangs look natural and flowy.
- Curly Hair: Curly bangs can be trendy and unique but require more maintenance.
- Thin Hair: Wispy or curtain bangs add dimension without looking heavy.
- Thick Hair: Blunt bangs work well, but they may need regular thinning.

3. Lifestyle:

- If you can commit to regular trims and styling, bangs are a great option.
- If you prefer low-maintenance hair, consider longer curtain bangs that can grow out gracefully.

4. Styling Goals:

- Use bangs to highlight features (e.g., eyes).
- Create a youthful or fresh look.

Bangs/Fringe

SHOULD YOU WEAR A FRINGE/BANGS?

When Not to Get Bangs

Bangs may not be the best choice in these scenarios:

1. Your Hair Texture is Difficult to Manage:
 - Very oily hair may require frequent washing.
 - Frizzy hair may need more heat styling or products.
2. Your Face Shape Doesn't Complement Bangs:
 - For example, blunt bangs on a round face might emphasize roundness.
3. You Have a Cowlick or Widows Peak:
 - These can make bangs harder to style without additional effort.
4. You Don't Want the Upkeep:
 - Bangs require frequent trims (every 3-6 weeks) to maintain shape.
5. You're Uncertain About the Change:
 - Bangs are a dramatic style change, and growing them out takes time.
6. You Exercise or Sweat Frequently:
 - Bangs can become sweaty and stick to your forehead, requiring frequent restyling.

Haircut Layers

WHAT ARE HAIRCUT LAYERS?

Layers in a haircut are sections of hair cut at different lengths to create texture, movement, and shape. Instead of all the hair being the same length, layers provide a graduated effect that enhances volume, reduces weight, or frames the face.

Haircut Layers

WHAT ARE HAIRCUT LAYERS?

Types of Layers

1. **Long Layers:**

- Subtle and spaced-out layers throughout the length of the hair.
- Ideal for maintaining overall length while adding movement.
- Best for long, thick, or wavy hair.

2. **Short Layers:**

- Higher layers cut closer to the scalp.
- Creates more volume and texture, especially in shorter hairstyles like pixie cuts or bobs.

3. **Face-Framing Layers:**

- Layers focused around the face, often starting at cheekbones, jawline, or collarbones.
- Perfect for highlighting facial features and creating softness.

4. **Choppy Layers:**

- Uneven, textured layers for an edgy, modern look.
- Works well in shag haircuts or messy, tousled styles.

5. **Graduated Layers:**

- Layers cut to follow a specific gradient, often shorter at the top and longer at the bottom.
- Common in bobs or angled cuts for a sleek, polished appearance.

Haircut Layers

Benefits of Layers

1. **Add Volume:**

- Layers can make fine or thin hair appear fuller and bouncier.
- Shorter layers lift hair at the crown for added height.

2. **Reduce Weight:**

- Layers can lighten thick or heavy hair, making it easier to manage.
- Especially useful for curly or wavy hair to prevent bulkiness.

3. **Enhance Texture:**

- Layers create a sense of movement and dimension, making straight or wavy hair more dynamic.

4. **Frame the Face:**

- Well-placed layers can soften features, enhance cheekbones, or draw attention to the eyes.

5. **Increase Styling Versatility:**

- Layers make it easier to style hair in waves, curls, or messy, textured looks.

Haircut Layers

Who Should Get Layers?

- Straight Hair: Adds dimension and prevents a flat, one-length appearance.
- Wavy or Curly Hair: Helps distribute volume and reduce bulk for a balanced shape.
- Thick Hair: Reduces heaviness, making hair feel lighter and more manageable.
- Fine Hair: Adds the illusion of fullness and body.
- Round or Square Face Shapes: Layers can elongate the face and soften angular features.

Haircut Layers

Who Should Avoid Layers?

- **Very Fine or Thin Hair:**
 - Too many layers may make the hair look sparse.
 - Opt for minimal or long layers to maintain density.
- **Extremely Frizzy or Coarse Hair:**
 - Layers can exaggerate frizz or unevenness without proper styling.
- **Low-Maintenance Preferences:**
 - Layered cuts may require more styling effort to maintain their shape and texture.

Pixie/Short Cuts

Who Should Wear Short Hair?

1. **Face Shape:**

- Oval Faces: Almost any short haircut works well since this shape is balanced.
- Heart-Shaped Faces: Pixie cuts or short layers soften a wider forehead and accentuate cheekbones.
- Square Faces: Soft, wispy layers or side-swept bangs can soften angular features.
- Round Faces: Longer pixies with volume on top or asymmetrical cuts elongate the face.

2. **Hair Texture:**

- Straight Hair: Works beautifully with sleek, structured short styles.
- Wavy Hair: Adds natural texture and movement to short cuts.
- Curly Hair: Creates a unique and voluminous pixie, though it may require more maintenance.
- Fine Hair: Short haircuts can add the appearance of thickness and volume.

3. **Lifestyle:**

- Short hair is perfect for women who want a practical, stylish look that doesn't require much styling time.
- It works well for those open to regular trims to maintain the shape (every 4-6 weeks).

4. **Confidence and Expression:**

- Short haircuts are a bold statement and ideal for women seeking a fresh start or who want to showcase a confident, modern aesthetic.

Pixie/Short Cuts

Who Should Avoid Short Hair?

1. **Face Shape Mismatch:**

- Very Round Faces: Some short styles may exaggerate roundness unless carefully layered.
- Long Faces: Extremely short styles without volume can elongate the face further.

2. **Hair Texture Challenges:**

- Extremely coarse, frizzy, or thick hair can be harder to manage in very short styles without proper thinning or styling tools.

3. **Commitment Level:**

- If you're hesitant about maintenance or worried about the growing-out phase, a short haircut might not be the best choice.

4. **Personal Style:**

- Short haircuts are bold and may not suit someone who prefers a more traditionally feminine or flowing aesthetic.

Blow Drying

When blow-drying your hair at home, start with towel-dried hair and apply a heat protectant to prevent damage. Use a round brush for volume or a paddle brush for sleekness, working in small sections for better control. Always point the dryer nozzle downward to smooth the hair cuticle and reduce frizz. Finish with a blast of cool air to lock in shine and set the style. I sell brushes and products at shop.thesalonguy.com which can help in the styling process.

WHAT TO SAY

1

ASK THE STYLIST/BARBER'S OPINION

2

SHOW PICS OF CUTS YOU WANT

3

ASK THEM WHAT YOUR FACE SHAPE IS

4

YOU WANT A CUT BEST FOR YOUR FACE SHAPE

5

HOW TO STYLE YOUR HAIR AT HOME

MAINTENANCE

To maintain healthy hair, start by using a gentle, sulfate-free shampoo and a moisturizing conditioner suited to your hair type. Avoid over-washing; cleanse 2-3 times per week to retain natural oils. Regular trims every 6-8 weeks prevent split ends and keep hair looking fresh. Minimize heat styling, and always use a heat protectant such as 25 Spray when applying hot tools. Lastly, maintain a balanced diet rich in vitamins and hydrate well to nourish your hair from the inside out. You can use shampoo's and conditioners from my brand at shop.thesalonguy.com.
